

Catholic Climate Covenant

December 2, 2022

Dear Secretary Buttigieg, Administrator Regan, and Mr. Podesta,

As Catholics, we are called to care for the earth, our common home, and support efforts to address pollution that harms communities and families across our nation and world, especially our most vulnerable brothers and sisters.

We applaud the historic climate investments codified in the Inflation Reduction Act. While the Act is estimated to draw down national greenhouse emissions 40% below 2005 levels by 2030, we still need to persist in efforts to meet the national goal of a 50% drawdown by 2030. We are excited by President Biden's announcement at COP27 this month to strengthen domestic methane standards, further protecting the environment. But opportunities still exist in the transportation sector, which contribute up to 27% of all U.S. greenhouse emissions, of which cars, light trucks, and heavy-duty trucks generate the most (58%).

The Environmental Protection Agency can lower GHG emissions and protect human health by enacting the strongest possible federal standards for these vehicles. In addition, stronger standards will help deliver greater savings to drivers over the lives of their vehicles while promoting the common good of a zero-emission future in the United States.

We, the U.S. Catholic community, urge you to act now by advancing clean car standards and moving our nation to our 100% zero-emission vehicles goal by 2035. We stand in solidarity with you in this effort.

Submitted with hope,
The 1,573 U.S. Catholics signed below
